DIRECT ACCESS TESTING (DAT)

Wray Community District Hospital is proud to offer Direct Access Testing (DAT) to our community. Low cost makes it easy to keep tabs on your health. WCDH Laboratory will not bill insurance for Direct Access Tests and payment is required at the time of service.

Benefits of Direct Access Testing:

- Low out-of-pocket expense for patients who are uninsured. *Cash, check or credit card accepted at the time of service.*
- Individuals may wish to have more frequent testing than their health care insurance plans will cover.
- Individuals can have basic lab testing performed without a physician's order, between wellness visits or according to personal preference.
